

Sheng Dai

Sheng Dai obtained his B.S. degree (1984) and M.S. degree (1986) in Chemistry at Zhejiang University, Hangzhou, China and his Ph.D. (1990) in Chemistry at the University of Tennessee, Knoxville. He is currently a Corporate Fellow and Group Leader in Chemical Sciences Division at the Oak Ridge National Laboratory and Professor of Chemistry at the University of Tennessee. He has published over 400 peer-reviewed journal papers and holds over 14 U.S. patents. His current research interests include ionic liquids, porous carbon and oxide materials, advanced materials and their applications for separation sciences and energy storage as well as catalysis by nanomaterials.
